

GCCTAAATCC

The image displays a DNA double helix structure with a sequence of 10 base pairs. The top strand is composed of the following bases from left to right: a yellow 'G', a blue 'C', two green 'A's, a red 'T', and two blue 'C's. The bottom strand is composed of the following bases from left to right: a blue 'C', a red 'T', a green 'A', a red 'T', a yellow 'G', and two blue 'C's'. The bases are connected by horizontal bars representing base pairs. The colors of the bases are: yellow for Guanine (G), blue for Cytosine (C), green for Adenine (A), and red for Thymine (T).
