

CGTCCTCGA

The image displays a DNA double helix structure. The top strand is composed of the following bases: C (blue), G (orange), T (red), C (blue), T (red), C (blue), G (orange), and A (green). The bottom strand is composed of the following bases: A (green), C (blue), G (orange), C (blue), G (orange), C (blue), A (green), and G (orange). The bases are connected by horizontal rungs, representing the base pairs. The rungs are colored to match the bases they connect: red for C-A, green for G-A, blue for T-C, and orange for C-G.
