

T T T T A A G T A T

The image displays a DNA sequence: TTTTAAAGTAT. The bases are color-coded: Thymine (T) is red, Adenine (A) is green, and Guanine (G) is orange. Below the sequence, horizontal lines indicate base pairing: a green line under the first T, a blue line under the second T, a blue line under the third T, an orange line under the fourth T, a green line under the first A, a green line under the second A, a green line under the G, a blue line under the T, a blue line under the A, and a blue line under the final T.
